EXPERIMENT 7

Experiment - 7

Date: 10/1/2023

Create a Snapshot & cloning of a vm and text it by loading the process previous version / cloned vm.

Aim: To create a snapshot and cloning of a virtual machine and test it by loading the previous version / cloned vm.

step1: Install the dade virtual machine box.

step2: click machine from dacle vm virtual box manager.

step3: select opened clone in the machine options.

step4: open clone virtual machine and asked to choose and optionally a folder to the new vm.

step5: The new machine will be a clone of the machine name.

step6: click next it gives the option to choose the type of clone we wish to create.
✓ Full clone ✓ linked clone.

step7: choose full clone and click finish then vm is created.

result: Hence, the snapshot and cloning of virtual machine is created.
