Experiment -1 - VM Creatation

create a virtual machine.

Aim: To create a virtual machine.

Procedure:

1) Install oacle virtual Box to windows.

2) To create virtual machine click malhine from oacle vm virtual box manager.

3) Then, click new & give the "Name" to vm and if neccessary Iso image also [optional]

4) To create vm we have to set hardware we can modify vm's hardware. by changing amount of RAM and virtual cpu count.

5) Next to add virtual hald disk if we want we can add & else we can create vm without virtual harddisk.

6) Now you get Summary of virtual Machine.
like.
→ machine Name & OS Type → its hardware
→ Disk.

7) Now click Finish.

Result:

Virtual machine is created.

It gives General System, display, storage, audio, Network, USB, Shared folder and description information.
